

*A natural way  
to enhance your feed power*

# Aqua~BOOSTER<sup>TM</sup>

## How to use as a feed additive:

Aqua~BOOSTER, represents an important alternative to be use in the aquaculture industry, as the specific additive to be use in the shrimp or fish feed, especially in the shrimp production and fish cultured in ponds.

Aqua~BOOSTER, is cocktail of live beneficial cells, immunoestimulants and live beneficial microorganisms such as *Saccharomyces cerevisiae*, *Streptococcus faecium*, *Lactobacillus acidophilus*,  $\beta$ 1,3 D-glucan, Mannan oligosaccharide, enzymes, vitamins and minerals as many others natural ingredients that are important for the growth of the shrimp and fish. All these beneficial microorganisms are very important in the direct feed because the shrimp and fish are cultured in a very hostile environment, a lot of pathogenic bacteria and *vibrios* are found in most of the ponds world wide. By using Aqua~BOOSTER you will enhance the immune system reducing the incidence of high mortalities and diseases that are very common in the ponds.

## How to use:

**Shrimp:** 5 kilos per metric ton of complete feed.

**Fish:** 2.5 kilos per metric ton of complete feed. (after extruction).

## Benefits:

Less mortality.

Better quality shrimp or fish.

Faster growth.

Less contaminated ponds (65% of feed is not consumed by shrimp).

*Healthy shrimp and fish*  
=  
*to more profits*

*A natural way  
to enhance your  
feed power*

your shrimp or fish*

# Aqua~BOOSTER<sup>TM</sup>

## To use in shrimp and fish ponds.

### Description:

**Aqua~BOOSTER** contains a unique mix of natural live beneficial microorganisms, extracts of special herbs, soluble yeast fermentation and mushrooms.

In the intensive production of shrimp and fish in ponds, **Aqua~BOOSTER** is recommended as the natural preventive to increase the good health, gain weight and better profits at the end of every harvest.

### Ingredients:

**Aqua~BOOSTER** is made of live beneficial microorganisms microencapsulated of *Saccharomyces cerevisiae*, *Mannan oligosaccharide*,  $\beta$ 1,3 *D-Glucan*, *Bacillus subtilis* *Bacillus licheniformis*, *Aspergillus oryzae* and *Aspergillus Niger* base in a dry matter as a fermentation soluble. *Chloflexus aurantiacus*, *Yucca schidigera*, specific antibodies specially made for the use of shrimp and fish, special vitamins and amino acids and proteinate minerals.

### How to use it:

Mix 4 kilos of **Aqua~BOOSTER** in 1,000 liters of water (fresh or salty water) adding 10 kilos of molasses and let it fermentate from 36 to 48 hours, using continuous aeration, after fermentation spread approximately 45 liters per hectare in the pond to be treated, keeping 10% of the fermentation, adding 1 kilo of **Aqua~BOOSTER** and 900 more liters of water plus 10 more kilos of molasses until harvest keep doing it every 48 hours, in case of illumination, do it every 24 hours until it disappears (approximately 3 days) illumination is caused by excessive *vibrios* in the shrimp.

### Benefits:

1. - Better quality shrimp more solid.
2. - Better taste.
3. - Less mortality.
4. - Faster gain weight.
5. - More shrimp at harvest time.

### Storage:

Store in a cool and dry place avoiding the direct sun light.

### Presentation:

**Aqua~BOOSTER** is available in 25 kilos paper bag.

### Physical characteristics:

Light brown flowing powder.

### Shelf life:

24 months if stored in a cool place.
